	Summary of Data Gaps	
Table 5.	Summary of Potential Concerns Associated with Property Acquisition	12

# 1. Introduction and Project Description

#### 1.1 Introduction

This Supplemental Hazardous Materials Technical Report (S-HMTR) was prepared to support the Final Environmental Impact Statement for the Purple Line and is intended to identify, to the extent feasible, potential hazardous waste issues or other recognized environmental concerns (RECs) related to sites located within the project's proposed limit of disturbance (LOD). This S-HMTR reflects field observations, other field-verified information, and data from a variety of sources collected and analyzed by Chesapeake Environmental Management, Inc. (CEM). This report also includes recommendations for further study.

The S-HMTR is not intended to directly support any potential future property, easement, or right-of-way acquisitions. Data obtained to complete this study will help guide the continued evaluation and refinement of the Preferred Alternative alignment. Data and findings of this S-HMTR have been incorporated into the Final Environmental Impact Statement (FEIS) for the project.

# 1.2 Project Description

The Purple Line is a proposed 16.2-mile transit line located north and northeast of Washington DC, inside the circumferential I-95/I-495 Capital Beltway. The Purple Line would extend between Bethesda in Montgomery County and New Carrollton in Prince George's County. The "Purple Line corridor" includes five major activity centers: Bethesda, Silver Spring, Takoma/Langley Park, College Park, and New Carrollton.

The purposes of the Purple Line project are the following:

- Provide faster, more direct, and more reliable east-west transit service connecting the major activity centers in the Purple Line corridor at Bethesda, Silver Spring, Takoma/Langley Park, College Park, and New Carrollton,
- Provide better connections to Metrorail services located in the corridor, and
- Improve connectivity to the communities in the corridor located between the Metrorail lines.

There are two Alternatives discussed herein: the No Build Alternative and the Preferred Alternative.

#### 1.2.1 No Build Alternative

The No Build Alternative represents the future conditions of transportation facilities and services in 2040 in the corridor if the Purple Line were not built. The No Build Alternative includes the existing highway network and transit service, plus those transportation projects listed within the Purple Line corridor for which funding sources have been identified and have been included in the National Capital Region Transportation Planning Board's (TPB) *Financially Constrained Long-Range Transportation Plan* (CLRP) for implementation by 2040. The No Build Alternative provides the basis against which the Preferred Alternative is compared.

#### 1.2.2 Preferred Alternative

The Preferred Alternative would be at grade except for one short tunnel section and three sections elevated on structures. The Preferred Alternative would operate mainly in dedicated or exclusive lanes, providing fast, reliable transit operations.

The following 21 stations are planned for the Preferred Alternative:

- Bethesda
- Chevy Chase Lake
- Lyttonsville
- Woodside/16<sup>th</sup> Street
- Silver Spring Transit Center
- Silver Spring Library
- Dale Drive
- Manchester Place
- Long Branch
- Piney Branch Road
- Takoma/Langley Transit Center

- Riggs Road
- Adelphi Road/West Campus
- UM Campus Center
- East Campus
- College Park
- M Square
- Riverdale Park
- Beacon Heights
- Annapolis Road/Glenridge
- New Carrollton

Stations would include ticket vending machines, weather shelters for passengers, lighting, wayfinding and informational signage, trash receptacles, seating, and security equipment such as emergency telephones and closed circuit television cameras. Most riders would walk to the stations or transfer from other transit services. Access plans for each station have been developed to enhance pedestrian and transit access for nearby communities. The stations would have either side or center platforms depending on the site characteristics and space availability.

Two storage and maintenance facilities are proposed: one at Lyttonsville in Montgomery County and the other at Glenridge in Prince George's County. Additionally, traction power substations, used to convert electric power to appropriate voltage and type to power the light rail vehicles, would be required approximately every mile.

As part of the Preferred Alternative the permanent Capital Crescent Trail would be constructed within the Georgetown Branch right-of-way for a distance of 3.3 miles between Bethesda and the CSXT Metropolitan Branch. At the junction with the CSXT the trail is planned to continue on the north side of the CSXT corridor to the SSTC. The permanent Capital Crescent Trail would replace the existing Georgetown Branch Interim Trail which currently extends from Bethesda to Stewart Avenue within the Georgetown Branch right-of-way. The completion of the trail along the CSXT corridor is contingent on agreement with CSXT on the use of their property on the north side of the CSXT tracks for the trail. If agreement is not reached by the time the Purple Line construction occurs, MTA would construct the trail from Bethesda to Talbot Avenue. From Talbot Avenue to Silver Spring an interim signed bike route on local streets would be used. MTA will plan, design, and construct the permanent Capital Crescent Trail between Bethesda and Silver Spring concurrently with the Purple Line. The Capital Crescent Trail will be owned and operated by Montgomery County, which will be responsible for providing the funds to construct it.

# 2. Regulatory Context and Methodology

## 2.1 Introduction

Under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), land owners are held liable for contamination even if the contamination occurred with a previous land owner. The USEPA (2005) has established a rule (40 CFR, Part 312 "Standards and Practices for All Appropriate Inquiries", often referred to as "All Appropriate Inquiry" or AAI) that defines criteria necessary for the purchaser of a property to establish the "Innocent Landowner Defense." The American Society for Testing and Materials (ASTM) E 1527-05 process meets this standard. This process involves performing a Phase I Environmental Site Assessment (ESA) to identify any potential recognized environmental conditions (RECs). An REC is defined as "the presence, or likely presence, of hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or material threat of a release of any hazardous substance or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property" (ASTM, 2005). A list of acronyms used in this report is provided in Appendix A, and a list of terms and their definitions is provided in Appendix B.

CEM prepared this S-HMTR in accordance with ASTM E 1527-05 (Standard Practice for ESAs: Phase I ESA Process). Work completed to support this report consisted of a review of current and historic activities and conditions within the study area and surrounding sites; review of local, state, and federal regulatory database records; review of available historic records; and a survey of land uses adjacent to the project study area.

## 2.1.1 Assumptions

In expressing the opinions stated in this report, CEM has exercised the degree of skill and care ordinarily exercised by a reasonable, prudent Environmental Professional in the same community and in the same time frame given the same or similar facts and circumstances. CEM assumes that MTA, as set forth in the contractual agreement, is also the user as defined by ASTM E-1527-05. Documentation and data provided by MTA, designated representatives thereof, or other interested third parties, or from the public domain, and referred to in the preparation of this assessment, were used and referenced accordingly. Consequently, CEM assumes no responsibility or liability for the accuracy of such documentation or data.

The independent conclusions in this report represent CEM's professional judgment based on information and data available to CEM during the course of our investigation. The factual information regarding operations, conditions, and test data provided by MTA or their representatives are assumed to be correct and complete. The conclusions presented are based on the data provided and reviewed by CEM, observations made by CEM, and conditions that existed on the date of the on-site inspections.

## 2.1.2 Limitations and Exceptions

Because this S-HMTR is intended to reflect study and analysis of readily available data and field conditions observable during the allotted time of field study, CEM does not warrant that there are no toxic or hazardous materials or contamination associated with the study area, nor does CEM accept any liability if such are found at some future time, or could have been found if sampling or additional studies were

conducted. CEM does not assume responsibility for other environmental issues that may be associated with this study area.

In view of the rapidly changing status of environmental laws, regulations, and guidelines, CEM cannot be responsible for changes in laws, regulations, or guidelines that occur after the study has been completed that may affect the subject site.

This report was prepared for MTA by CEM and is based, in part, on third-party information not within the control of MTA or CEM. While it is believed that the third-party information contained herein is reliable according to the conditions and limitations described in this report, neither MTA nor CEM guarantees the accuracy of the third-party information.

#### 2.1.3 User Reliance

This report is exclusively for the use and benefit of MTA, and has been incorporated into the FEIS. This S-HMTR report is not for the use or benefit of, nor may it be relied upon by, any other person or entity without the advance written consent of MTA.

# 2.2 Methodology

# 2.2.1 Study Area and Property Selection

The project study area boundary was based on the limit of disturbance (LOD), which includes all potential construction areas associated with the Preferred Alternative that have been identified to date during the preliminary engineering studies conducted and prepared for the project.

The study area was broken into the following six segments for the purposes of this S-HMTR:

- Bethesda/Chevy Chase
- Silver Spring
- University Boulevard
- University of Maryland / College Park
- Riverdale Park
- New Carrollton

Segmentation allowed the existing environmental settings/conditions of the study area to be described more easily, rather than describing the conditions for the whole study area in one statement. Appendix C includes a Project Overview Map, showing the six segments, followed by aerials which give a detailed view of the LOD.

Each land parcel located within or overlapping the LOD was identified through a search of Maryland State Department of Assessments and Taxation records and assigned a unique site identification number (Appendix D - Summary Table 1). The site identification numbers were used to correlate information gathered during all data collection activities. Each site is identified by a unique site identification number on the Potentially Contaminated Sites Map (see Appendix C – Figure 3, sheets 1 through 39).

#### 2.2.2 Data Collection

## Environmental Setting

In order to determine the potential impacts of a site on the proposed project area, general characteristics of each site were identified through an analysis of existing environmental features. Existing topography, surface water, geology, soils, wetland, and floodplains were evaluated to determine the potential for storage and migration of potential contaminants within the study area.

These characteristics were identified by reviewing the following maps and surveys for each segment of the study area:

- The United States Geological Survey (USGS) 7.5-Minute Topographic Quadrangle maps were used to determine the general site elevations and to identify surface water resources within the study area and/or potentially affected by the project.
- The Geologic Map of Maryland (Maryland Geological Survey, 1968) was analyzed to determine the rock soil formation types present within and along each segment of the study area.
- The Soil Survey of Montgomery County, Maryland (U.S. Department of Agriculture (USDA) 1995) and the Soil Survey of Prince George's County, Maryland (USDA 1967) were reviewed to determine existing soil series within and along each segment of the study area.
- The United States Fish and Wildlife Service (USFWS) wetland maps, the National Wetland Inventory (NWI) maps, and the Flood Insurance Rate Maps to determine whether previously identified wetlands or floodplains are known to exist within and/or along each segment of the study area.

#### Historical Environmental Records Review

To fulfill ASTM E 1527-05 research requirements pertaining to standard environmental record sources, a Corridor Study Report was obtained from Environmental Data Resources, Inc. (EDR) along with supplementary information sources (including historical aerial photographs, historical topographic maps, and Sanborn Fire Insurance Maps) considered to constitute additional environmental records. Database content is explained, and supplemental information pertaining to sites surrounding the project study area is provided in the EDR report, included as Appendix E of this S-HMTR.

# Regulatory File Review

Public Information Act requests were submitted to the Maryland Department of the Environment (MDE), and Freedom of Information Act requests were submitted to the US Environmental Protection Agency (EPA) regarding the storage and release of hazardous materials and/or petroleum products, or other known environmental issues located on property within or immediately adjacent to the study area. Once the data was made available for review, file reviews were performed by CEM.

# Site Inspections

CEM performed non-intrusive inspections at 573 sites identified within the ESA study area, between November, 2011 and February, 2012. To gather information regarding any potential RECs, field staff studied general surface and groundwater flow, geologic setting, topography, building layouts, and the conditions of existing structures. All pertinent information was recorded using field mapping and digital photographs. When knowledgeable property owners were available on-site, CEM interviewed the owners to discuss the environmental history of the site. No on-site building interiors were inspected, unless access and permission were granted by the on-site personnel during the site inspection.

## 2.2.3 Ranking Criteria

Each of the 573 sites was individually analyzed regarding their potential for impact to the existing site, proposed project corridor, and adjacent sites. Each site was classified for its potential for concern based upon the land uses<sup>1</sup> and observed site conditions. A numeric ranking of 1 through 6 was assigned to each site. Table 1 is a summary of site features that could be present on a given site, which would result in the assigned rankings.

#### Table 1. Potential For Impact - Ranking Criteria

#### Rank 1 – High Potential for Impact

- Industrial facilities
- Gasoline stations
- Automobile repair facilities
- Paint manufacturing facilities
- Aboveground Storage Tanks (ASTs) with a large amount of staining
- Underground Storage Tanks (USTs) containing gasoline, jet fuel, kerosene fuel, waste oil, or solvents
- Landfills
- Remediation systems in place
- Pits and lagoons
- Dry cleaners
- Polychlorinated biphenyl (PCB) transformers with major stains
- Surface dumps with drums or other hazardous materials

#### Rank 2 – Listed Sites

• Regulatory database listed sites that could not be otherwise classified, due to insufficient location data or MDE regulatory information.

#### Rank 3 – Medium/High Potential for Impact

- USTs containing materials other than listed above
- Surface dump with empty drums or other materials of concern
- Mounds

- ASTs with several medium stains
- Suspected PCB containing transformers with minor stains

#### Rank 4 – Medium Potential for Impact

- Small amounts of surface staining
- Slightly discolored surface water
- Suspected PCB containing transformers with no staining
- Distressed vegetation
- Unmarked transformers

- Large surface dumps containing household wastes
- ASTs with a few small stains or no staining, but questionable integrity
- Hazardous material storage sites

#### Rank 5 – Medium/Low Potential for Impact

• Regulatory database identified facilities that are not located within the limits of the disturbance and that are not expected to result in impacts to the study area.

#### Rank 6 – Low Potential for Impact

- Small surface dumps containing household wastes
- ASTs (relatively new) with no staining or evidence of poor structural integrity
- Septic systems
- Automobile repair/vehicle maintenance facilities on non-adjacent sites that are not expected to result in impacts to the study area

<sup>&</sup>lt;sup>1</sup>Land uses that might indicate a higher potential for concern include businesses that manufacture, use, transport, or store petroleum products, solvents, paints, or electrical equipment that may have used PCBs, explosives, and glues.

Properties assigned a ranking of 1 were deemed to have a relatively high potential for RECs, contamination, hazardous waste, or materials that could affect human health. Some properties that are listed on environmental regulatory databases, but could not be otherwise classified due to insufficient data, were given a ranking of 2 and are conservatively presumed to warrant further inquiry and investigation. Properties ranked 3 or 4 are considered to have a moderate potential for concern, and properties ranked 5 or 6 are considered to have a relatively low potential for concern.

## 3. Affected Environment

# 3.1 Environmental Setting

The environmental setting of the study area varies throughout the six segment areas. Specific site characteristics, including topography, surface water, geology, soils, and wetlands are summarized per segment in Appendix D – Summary Table 2.

#### 3.2 Historical Environmental Records Review

## 3.2.1 EDR Corridor Study

A summary of the state regulatory database findings, provided in Appendix D of this S-HMTR, is presented in Table 2. The database search was performed according to the appropriate ASTM search radius distances for each database. The last column in Table 2 lists the number of sites found outside of the study area but still within the appropriate ASTM search distances.

Table 2. Sta	te Environmental	Database	Summary
--------------	------------------	----------	---------

State Database	ASTM Search Distance	Sites within Study Area	Sites within ASTM Search Distances
Above Ground Storage Tanks (AST)	0.25 Mile	1	2
Drycleaners	0.25 Mile	2	34
Engineering Controls	0.5 Mile	1	3
Financial Assurance	Study Area	26	104
Historical Leaking Underground Storage Tanks (HIST LUST)	0.5 Mile	10	38
Historical Underground Storage Tanks (HIST UST)	0.25 Mile	38	259
Lead	Study Area	11	47
Land Restoration Program	0.5 Mile	1	13
Maryland Oil Control Program Cases	0.5 Mile	78	723
Underground Storage Tanks (UST)	0.25 Mile	48	310
Voluntary Cleanup Program (VCP)	0.5 Mile	3	13

Note: Sites may be listed in more than one database.

A summary of the federal regulatory database findings, provided in Appendix E of this S-HMTR, is presented in Table 3. The database search was performed according to the appropriate ASTM search radius distances for each database. The last column in Table 3 lists the number of additional sites found outside of the study area but still within the appropriate ASTM search distances.

Federal Database	ASTM Search Distance	Sites within Study Area	Sites within ASTM Search Distances
Emergency Response Notification System (ERNS)	Study Area	1	2
Federal Index System (FINDS)	Study Area	54	216
	,	າ	-
Integrated Compliance Information System (ICIS)	Study Area	3	5
Resource Conservation and Recovery Act – Conditionally Exempt Small Quantity Generator (RCRA-CESQG)	0.25 Mile	11	64
Resource Conservation and Recovery Act (RCRA) – Non-Generator	0.25 Mile	6	33
RCRA-Small Quantity Generator	0.25 Mile	11	89
Note: Sites may be listed in more than one database.			

Table 3. Federal Environmental Database Summary

## 3.2.2 EDR Aerial Photographs

EDR provided historical aerial photographs from the following years: 1957, 1963, 1970, 1980, and 1988. Through a review of these maps, it was determined that the scale and resolution of the historical aerial photographs precluded them as a reasonable source of information for detailed analysis of the changes in land use within the study area. Therefore, changes in the land use over time, within the project study area, were determined through an analysis of topographic maps and Sanborn maps instead.

## 3.2.3 EDR Topographic Maps

EDR provided historical topographic maps from the following years: 1908, 1923, 1943, 1944, 1945, 1950, 1951, 1956, 1957, 1965, 1971, 1979, 1980, 1983, and 1994. These maps were reviewed to determine the potential changes to land usage and infrastructure that may be considered a REC. The data collected from this review have been summarized by segment and presented in Appendix D – Summary Table 3.

# 3.2.4 EDR Sanborn Map Review

EDR provided Sanborn Fire Insurance Maps (SFIMs) from the following years: 1927, 1939, 1959, 1963, and 1964. These maps were reviewed to determine the historical land uses along the project study area, and all previous land uses that would be considered a REC were identified. The data collected from this review has been summarized and presented in Appendix D – Summary Table 4. Copies of the reviewed SFIMs are provided in Appendix H of this S-HMTR.

# 3.3 Regulatory File Review

Montgomery and Prince George's County health department officials confirmed that the most accurate and complete regulatory information regarding potential environmental impacts would be available through MDE and EPA.

## 3.3.1 State Regulatory Data Review

MDE provided CEM access to multiple files for review from the following state databases.

- Air and Radiation Management Administration
- Science Services Administration
- Land Management Administration

The data obtained from the MDE file reviews has been summarized and presented in Appendix D – Summary Table 5. All file request correspondence with the state agencies is included in *Public Information Act Requests to Agencies and Agency Responses* - Appendix F of this report.

## 3.3.2 Federal Regulatory Data Review

EPA provided CEM access to multiple files for review from the following federal databases.

- Air Protection Division
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)
- Land and Chemicals Division
- Pesticides/Asbestos Program
- Resource Conservation and Recovery Act (RCRA) Program
- Toxics Program
- Water Protection Division

The data obtained from the EPA file reviews has been summarized and presented in Appendix D – Summary Table 5. All file request correspondence with the federal agencies is included in *Freedom of Information Requests from Federal Agencies and Responses* - Appendix G of this report.

# 3.4 Site Inspections

Non-intrusive site inspections were performed at 573 sites identified within the ESA study area. Aerial photographs were correlated with field-verified features to locate visible potential RECs at the property. Photographs of the RECs encountered were collected and are presented in Appendix I – Photograph Log. On-site interviews were conducted whenever owners or knowledgeable representatives were available on-site. In cases where interviews were not obtained at initial inspection, but the CEM inspector determined additional information would be useful in assessing the site, repeat visits were scheduled so that an interview could be conducted. The data obtained from the site inspections is summarized below and relevant site features are delineated on the Potentially Contaminated Sites Map (Appendix D - Figure 3, sheets 1 through 39).

- ASTs ASTs were observed at 43 sites within the study area. The materials stored in the ASTs included gasoline, diesel, kerosene, heating oil, waste oil, dry-cleaning fluid, and antifreeze. The tank capacities ranged in size from 250 gallons to 10,000 gallons.
- Chemical Storage Sites Large quantities of potentially hazardous chemicals were observed to be stored at 28 sites within the study area. The chemicals stored at these sites included dry cleaning chemicals, heavy-duty cleaning chemicals, degreasers, solvents, pesticides, pool chemicals, salt brine, and used batteries.

- Drum Storage Sites Designated drum storage areas were observed at 28 sites within the study area.
   The contents of the multiple 55-gallon drums included waste oil, bleach, dry cleaning chemicals, antifreeze, used oil filters, virgin oil, and cooking grease.
- Dry Cleaners Active dry cleaning facilities were observed at 7 sites within the study area.
- Dumping Sites Illegal dumping was observed at 5 sites within the study area. The materials
  observed in the dumping areas included landscaping debris, construction debris, 55-gallon drums, and
  used tires.
- Oil/Water Separators Oil/water separators were observed at 23 sites within the study area.
- Pad Mounted Transformers 58 pad mounted transformers were observed within the study area. These transformers were unlabeled, and the internal PCB content is unknown.
- Pole Mounted Transformers 114 pole mounted transformers were observed within the study area.
  The majority of these transformers was observed along the roadways, located within the public rightof-way. Due to the height of the pole mounted transformers, labels indicating the PCB content were
  not visible.
- USTs USTs were observed at 34 sites within the study area. The materials stored in the USTs included gasoline, diesel, kerosene, heating oil, and waste oil. The tank capacities ranged in size from 550 gallons to 30,000 gallons.

# 3.5 Summary of Recognized Environmental Conditions

Findings of the ESA documented in this S-HMTR, based on analysis of previous and current land uses, information obtained from government agency sources during records review, and the observations made in the field during site inspections, indicate evidence of RECs present within or adjacent to the project study area, suggesting potential for the existence of hazardous materials within the study area. A numeric ranking of 1 through 6 was assigned to each site, based on the potential for impact, with a ranking of 1 indicating the highest potential for impact, and a ranking of 6 indicating the lowest potential for impact. All sites evaluated as part of this investigation are listed with their ranking in Appendix D – Summary Table 6 and delineated on the Potentially Contaminated Sites Maps (Appendix C - Figure 3, sheets 1 through 39) with color coding to indicate the "potential for impact" ranking number.

<u>Sites with a High Potential for Impact</u> – A total of 49 sites were assigned a ranking of 1, meaning that they present the highest potential for impact to the proposed project. Included in this category are sites containing USTs with petroleum or solvent products, ASTs where potential leaking has occurred, gas stations, dry cleaning facilities, industrial facilities, and automobile repair facilities.

<u>Listed Sites</u> – A total of 22 sites were assigned a ranking of 2, meaning that while there is a potential for significant impact to the proposed project, the exact impact has not yet been determined due to limited or insufficient data available from recognized data sources. Should additional regulatory information become available, either from regulatory sources or through further field investigations, analysis of such information may result in a change in the assigned ranking.

<u>Sites with a Medium/High Potential for Impact</u> - A total of 25 sites were assigned a ranking of 3, meaning that they present a significant potential for impact to the proposed project. Sites assigned the medium/high impact ranking include those containing heating oil USTs, ASTs where moderate staining was observed, significant chemical storage, unregulated dumping, and unlabeled electrical transformers where minor staining was observed.

10

<u>Sites with a Medium Potential for Impact</u> - A total of 133 sites were assigned a ranking of 4, meaning that they present a moderate potential for impact to the proposed project. The sites assigned the medium impact ranking include those with unlabeled electrical transformers, large household waste dumping areas, and ASTs where minimal leaking has been observed.

<u>Sites with a Medium/Low Potential for Impact</u> – There were no sites assigned a ranking of 5 since the site investigation was focused identifying sites with potential for direct impacts to the study area. A ranking of 5 is typically assigned to sites identified in regulatory databases that are located outside of the study area and likely would not result in impacts to the study area.

<u>Sites with a Low Potential for Impact</u> - A total of 344 sites were assigned a ranking of 6, meaning these sites present a low potential for impact to the proposed project. These sites include properties where existing ASTs were observed to be in good condition, sites of small surficial dumping areas, and sites where no sources of potential contamination were observed.

# 3.6 Data Gaps

Table 4 summarizes types of data gaps associated with this S-HMTR investigation and reasons for such gaps. A data gap is defined by ASTM E 1527-05 as "a lack of, or inability to obtain, information required by this process despite good faith efforts by the Environmental Professional to gather such information" (ASTM, 2005). Data gaps may result from the incompleteness in any of the activities required by this process including, but not limited to, the site reconnaissance, interviews, and historical research. Failure to achieve the historical research objectives identified in the standard is termed a data failure and is a type of data gap.

Table 4. Summary of Data Gaps

Data Gap	Reason for Occurrence / Significance & Rationale
Site Reconnaissance	Property access was not granted to all sites impacted by the Preferred Alternative.  Additional detailed information could be collected if access was granted to the target property.
Interviews with knowledgeable parties (previous owners, facility managers, employees, occupants)	Interviews were not feasible due to the absence of knowledgeable personnel at many of the sites. During the site inspections, attempts were made to interview the property owner/manager but they were not always available for questioning. Additional information regarding the history of the site could be discovered that has not been found in the paper sources reviewed.

## 4. Recommendations

Prior to the full or partial acquisition of property, MTA would perform a Phase II ESA on parcels that have been identified as having the potential for contamination. The sites of concern are those ranked 1 or 2 unless the property can be accurately classified by other means or methods. MTA also would perform further records research on sites with a ranking of 4 to determine potential involvement with PCBs.

The Phase I ESA rankings of the 64 properties proposed for full or partial acquisition are shown in Table 5.

Ranking	Description	Number of Sites
1	Sites with a High Potential for Concern	11
2	Listed Sites	1
3	Sites with a Medium/High Potential for Concern	1
4	Sites with a Medium Potential for Concern	17
5	Sites with a Medium/Low Potential for Concern	0
6	Sites with a Low Potential for Concern	34
Total		64

Table 5. Summary of Potential Concerns Associated with Property Acquisition

In addition, a number of sites have been identified where further sampling and site investigation are recommended, as described below. Additional information may become available (that was not available at the scheduled completion of this report) that should be reviewed for relevance to potential impacts to the proposed project. Once the recommended additional investigation and analysis activities are complete, in conjunction with information provided herein, the MTA should have sufficient data to perform the following tasks.

- Accurate identification of potential health and safety risks that construction workers and the public will be exposed to during the construction phase of the project.
- Accurate determination of proper removal and disposal actions to be used in handling all regulated waste materials encountered during the proposed construction phase of the project.
- Provision of sufficient documentation to satisfy the "All Appropriate Inquiries" requirements for the purpose of "Innocent Landowner Defense" under CERCLA for any property acquisition negotiations.

# 4.1 Additional Sampling Activities

Based on the Phase I ESA findings, sampling and data collection activities are recommended at 153 sites, including the 64 that would be either fully or partially acquired. Depending on the type of concerns identified and the type of suspected contamination present, the sampling and data collection activities would differ at each site. Due to the variety of RECs observed within the study area, a combination of soil sampling, groundwater sampling, and ground penetrating radar is recommended for specific sites, to more accurately determine potential impacts to the proposed project. Appendix D – Summary Table 7 defines sites within the project study area where further analysis is recommended. Those sites where multiple types of further testing are recommended may be prioritized and studies coordinated when

12

possible. Samples collected from sites with suspected petroleum contamination should be analyzed for the following parameters.

- Total Petroleum Hydrocarbon-Diesel Range Organics (TPH-DRO) (EPA method 8015B)
- Total Petroleum Hydrocarbon-Gasoline Range Organics (TPH-GRO) (EPA method 8015B)
- Volatile Organic Compounds (VOCs) (EPA method 8260B)
- Priority Pollutant Metals (PPM) (EPA method 6020)

Samples collected from sites with suspected solvent-based contamination should be analyzed for the following parameters:

- VOCs (EPA method 8260B)
- Semi-Volatile Organic Compounds (SVOCs) (EPA method 8270)

Samples collected from sites with potential PCB contamination should be analyzed for the following analytical parameter:

PCBs (EPA Method 8082)

<u>Surficial Soil Sampling:</u> Forty sites have been identified for further study where surficial soil sampling would be the most appropriate type of testing, to identify the nature and extent of potential contamination as a result of ASTs and chemical storage areas leaking product into the soil, or where operator error resulted in surface spills. Soil samples should be collected between 0 and 2.5 feet below ground surface. Additional subsurface soil sampling may be recommended based on the analytical results of the surficial sampling.

If extensive cut and fill operations are to occur within the railroad right-of-way, surficial soil sampling should be performed to identify the nature and extent of any potential contamination that may exist as a result of leaking rail cars and routine railroad activities. All soil samples should be submitted to a laboratory and analyzed for standard petroleum parameters, as well as polycyclic aromatic hydrocarbons (PAHs) according to EPA method 8270C.

<u>Subsurface Soil Sampling:</u> Sixty-one sites have been identified where subsurface soil sampling should be performed to identify the nature and extent of the potential contamination resulting from hazardous materials stored below grade and the occurrence of leaking USTs. Soil samples should be collected between the approximate depth of the tank and the groundwater interface zone. Field screening of all soils encountered should be performed to ensure that no surficial contamination has occurred. If monitoring wells are present at the site, groundwater samples should be collected and submitted to a laboratory for analysis.

Groundwater Sampling: Thirty-nine sites have been identified where groundwater sampling should be performed to identify the nature and extent of the potential contamination as a result of USTs and chemical storage areas leaking product to the soil or operator error resulting in surface spills. Groundwater samples should be collected from on-site monitoring wells, if available, and additional subsurface investigation may be recommended based on the analytical results of the groundwater sampling.

<u>Confirmatory Soil Sampling:</u> Six sites have been identified where confirmatory soil sampling should be performed along the edge of the property to determine if potential contamination exists as a result of

previous land uses on adjacent sites. It is recommended that soil samples are collected and analyzed to determine if any potential contamination related to the adjacent sites exists within the LOD. Additional investigation may be recommended based on the analytical results of the soil sampling.

<u>Confirmatory Groundwater Sampling:</u> Seven sites have been identified where confirmatory groundwater sampling should be performed along the edges of the property to determine if any potential contamination related to the adjacent sites exists within the LOD as a result of previous land uses of adjacent sites. Additional investigation may be recommended based on the analytical results of the groundwater sampling.

Ground Penetrating Radar (GPR) Surveys: Three sites have been identified where ground penetrating radar (GPR) surveys should be performed to determine if buried materials exist. Additional investigation may be recommended based on the findings of the GPR survey.

#### 4.2 Additional Data Collection Activities

Additional Site Inspections: Eight sites have been identified where additional site inspections should be performed to properly document the RECs located on-site. Complete on-site inspections were not performed at these sites during the initial inspection due to property access issues. Therefore, all observations recorded for these sites were made from the public right-of-ways. Although some assumptions could be made regarding existing site conditions, based on the initial observations, it would be prudent to perform a complete inspection of these sites to satisfy the All Appropriate Inquiry requirements for the purpose of Landowner Liability Protections under CERCLA. Additional sampling may be recommended based on the findings of the completed site inspections.

<u>Additional Regulatory Research:</u> Twenty-seven sites were identified where additional regulatory research should be conducted to further investigate the RECs identified during the site inspections. Additional investigation may be recommended based on the findings of the additional regulatory research.

<u>Additional Information Requests:</u> Fifty-eight sites have been identified where additional information requests should be made to regulatory agencies and local utility companies to confirm or deny the presence of PCBs in the unlabeled pad mounted electrical transformers. If the PCB content cannot be determined, surficial soil sampling should be performed in the vicinity of the unlabeled electrical transformers and submitted to a laboratory for analysis.

The properties would undergo the Phase II ESA as the design progresses to account for potential cleanup activities, contamination removal, or remediation including the following:

- Closure of inactive water wells
- Soil sampling of abandoned USTs to determine if petroleum had been released. The UST would either be removed or an oil/water separator would be installed, as required
- Pre-construction surveys of buildings identified for demolition or renovation to address site specific concerns, such as asbestos and lead-based paint
- Construction specifications to address soil and/or groundwater contamination
- Construction of a ventilation plant to be used in the event of an unexpected encounter with a volatile material

	Appendix B – Glossary/Terminology
	Appoint B Clossal J. Forminology

#### APPENDIX B

#### Glossary/Terminology

**Aerial**: Photographs of the ground taken from an elevated position, commonly an airplane.

**Alignment**: The horizontal location of a railroad or transit system as described by curved and tangent track.

**Contamination**: The presence of an unwanted constituent (contaminant) in a material, in a physical body, or in the natural environment.

**Engineering Controls**: Measures that are implemented at the work site to contain, control, and/or reduce exposure to hazardous materials.

**Floodplain**: Flat or nearly flat land adjacent a stream or river that stretches from the banks of its channel to the base of the enclosing valley walls and experiences flooding during periods of high discharge.

**Geology:** The soil and rock formations present beneath the ground surface.

**Groundwater:** Water located beneath the earth's surface in soil pore spaces and in the fractures of rock formations.

**Groundwater Interface Zone**: The surface of the water table where soils or rock below are completely saturated with water.

**Hazardous Substance**: A substance that is capable of causing or significantly contributing to an increase of mortality or serious illness.

**Light Rail Transit (LRT)**: A mode of public transit with tracked vehicles in multiple units operating in mixed traffic conditions on streets as well as sections of exclusive right-of-way. Vehicles are generally powered by electricity from overhead lines.

**Migration**: The physical movement of a contaminant through the groundwater by diffusion or with natural groundwater flow.

**Oil Water Separator**: A device that is designed to separate oil, wastewater and suspended solids for proper disposal.

**Pad Mounted Transformer**: An electric power distribution transformer in a locked steel cabinet mounted on a concrete pad.

**Pole Mounted Transformer**: An electric power distribution transformer mounted to a utility pole.

**Remediation**: The act or process of cleaning or removing a hazardous substance that was released into the environment.

**Soil:** The unconsolidated or loose covering of fine rock particles or organic materials that covers the surface of the earth.

**Solvent**: A substance that is commonly used in dry cleaning (e.g., tetrachloroethylene), as paint thinners (e.g., toluene, turpentine), as nail polish removers (acetone, methyl acetate, ethyl acetate), in spot removers (e.g., hexane, petrol ether), and in detergents (citrus terpenes).

Subsurface Soil: Soil located at a depth greater than six inches below the ground surface.

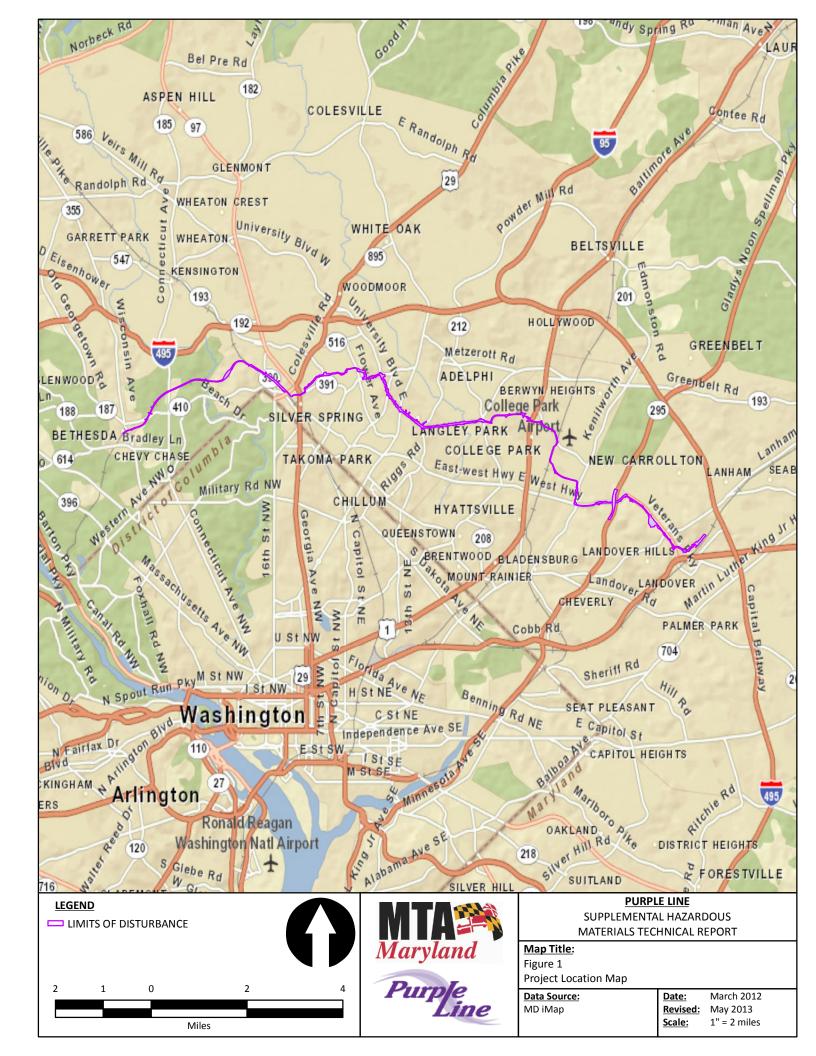

Surface Water: Water located on the ground surface in features such as lakes, ponds, rivers, or streams.

**Surficial Soil**: Soil located from zero to six inches below the ground surface.

**Topography:** Topography involves the recording of relief or terrain, the three-dimensional quality of the surface, and the identification of specific landforms.

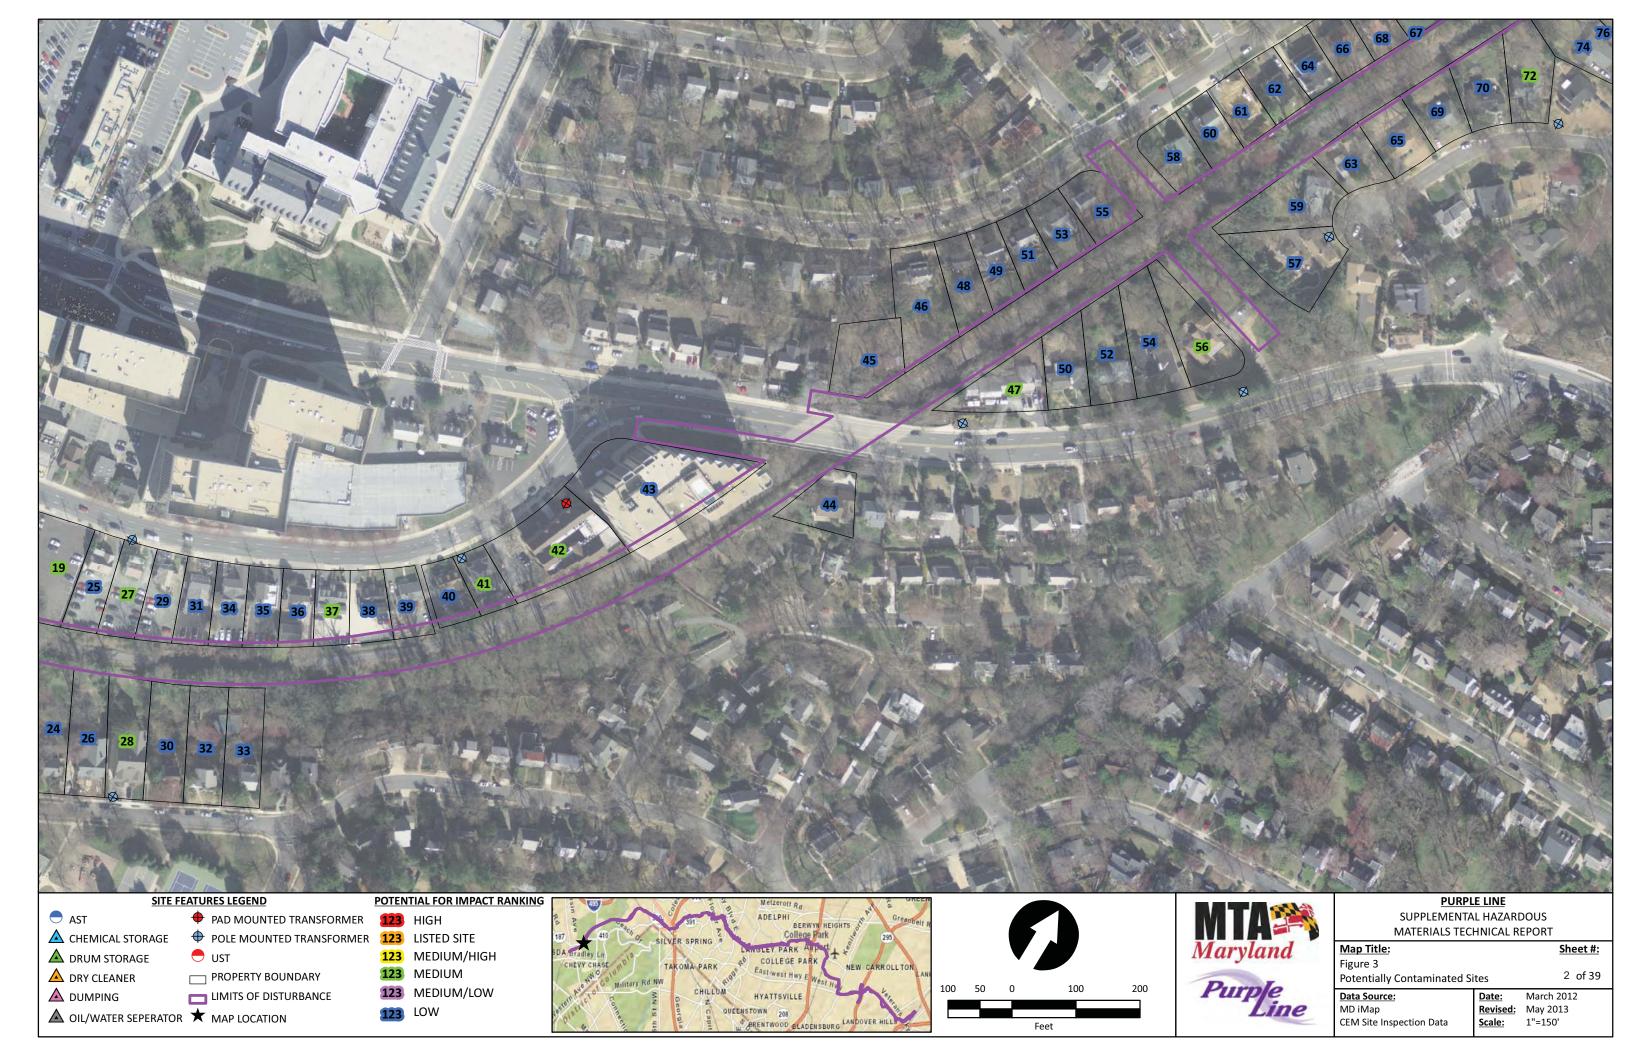

**Wetland**: A land area that is saturated with water, either permanently or seasonally, such that it takes on the characteristics of a distinct ecosystem.

Summary Table 3 – Topographic Map Review

SEGMENT	MAP NAME	MAP YEAR	MAP SERIES	DESCRIPTION OF AREA WITHIN STUDY AREA	DESCRIPTION OF PROPERTIES ADJACENT TO STUDY AREA
	Alexandria	1994	15	The alignment follows closely to Jones Bridge Road, Wisconsin Avenue, and the Baltimore and Ohio Railroad.	Adjacent properties include the WWDC radio towers, the National Naval Medical Center, the Columbia Country Club (with golf course) and several school complexes.
	Washington and Vicinity (1 of 4)	1943	7.5	The alignment follows closely to Jones Bridge Road, Wisconsin Avenue, and the Baltimore and Ohio Railroad.	Adjacent properties include the National Naval Medical Center, two country clubs, and a school complex.
	Washington West	1950	7.5	The alignment follows closely to Jones Bridge Road, Wisconsin Avenue, and the Baltimore and Ohio Railroad.	Adjacent properties include the National Naval Medical Center, two country clubs, and a school complex.
Bethesda/Chevy Chase	Washington West	1951	7.5	The alignment follows closely to Jones Bridge Road, Wisconsin Avenue, and the Baltimore and Ohio Railroad.	Adjacent properties include the WWDC radio towers, the National Naval Medical Center, the Columbia Country Club (with golf course) and a school complex.
	Washington West	1956	7.5	The alignment follows closely to Jones Bridge Road, Wisconsin Avenue, and the Baltimore and Ohio Railroad.	Adjacent properties include the WWDC radio towers, the National Naval Medical Center, two golf courses and several school complexes.
	Washington West	1965	7.5	The alignment follows closely to Jones Bridge Road, Wisconsin Avenue, and the Baltimore and Ohio Railroad.	Adjacent properties include the WWDC radio towers, the National Naval Medical Center, the Columbia Country Club (with golf course) and several school complexes.
	Washington West	1971	7.5	The alignment follows closely to Jones Bridge Road, Wisconsin Avenue, and the Baltimore and Ohio Railroad.	Adjacent properties include the WWDC radio towers, the National Naval Medical Center, the Columbia Country Club (with golf course) and several school complexes.
	Washington West	1980	7.5	The alignment follows closely to Jones Bridge Road, Wisconsin Avenue, and the Baltimore and Ohio Railroad.	Adjacent properties include the WWDC radio towers, the National Naval Medical Center, the Columbia Country Club (with golf course) and several school complexes.
	Washington West	1983	7.5	The alignment follows closely to Jones Bridge Road, Wisconsin Avenue, and the Baltimore and Ohio Railroad.	Adjacent properties include the WWDC radio towers, the National Naval Medical Center, the Columbia Country Club (with golf course) and several school complexes.

SEGMENT	MAP NAME	MAP YEAR	MAP SERIES	DESCRIPTION OF AREA WITHIN STUDY AREA	DESCRIPTION OF PROPERTIES ADJACENT TO STUDY AREA
	Kensington	1945	7.5	The alignment follows the Baltimore and Ohio Railroad at its western most alignment, but otherwise crosses no known point of concern.	Adjacent properties include residential neighborhoods.
	Kensington	1951	7.5	The alignment follows the Baltimore and Ohio Railroad at its western most alignment, but otherwise crosses no known point of concern.	Adjacent properties include residential neighborhoods. WWDC Radio Towers lie to the west and east of the westernmost alignment adjacent to Brookeville Road.
	Kensington	1956	7.5	The alignment follows the Baltimore and Ohio Railroad at its western most alignment, but otherwise crosses no known point of concern.	Adjacent properties include residential neighborhoods and the Rosemary Hills School. WWDC Radio Towers lie to the west of the westernmost alignment adjacent to Brookeville Road.
	Kensington	1971	7.5	The alignment follows the Baltimore and Ohio Railroad at its western most alignment, but otherwise crosses no known point of concern.	Adjacent properties include residential neighborhoods and the Rosemary Hills School. WWDC Radio Towers lie to the west of the westernmost alignment adjacent to Brookeville Road.
	Rockville	1908	15	The alignment follows the Baltimore and Ohio Railroad at its western most alignment, but otherwise crosses no known point of concern.	Adjacent properties include residential neighborhoods and undeveloped land.
	Rockville	1923	15	The alignment follows the Baltimore and Ohio Railroad at its western most alignment, but otherwise crosses no known point of concern.	Adjacent properties include residential neighborhoods and undeveloped land.
	Rockville	1944	15	The alignment follows the Baltimore and Ohio Railroad at its western most alignment, but otherwise crosses no known point of concern.	Adjacent properties include residential neighborhoods.
Silver Spring	Washington and Vicinity (1 of 4)	1943	7.5	The alignment passes through residential and institutional neighborhoods. The western edge of the alignment follows the Baltimore and Ohio Railroad to the northwest.	Adjacent properties include residential neighborhoods, at least two school complexes, and an armory located approximately at the corner of Wayne Avenue and Fenton Street.
	Washington West	1950	7.5	The alignment passes through residential and institutional neighborhoods. The western edge of the alignment follows the Baltimore and Ohio Railroad to the northwest.	Adjacent properties include residential neighborhoods, at least two school complexes, and an armory located approximately at the corner of Wayne Avenue and Fenton Street.
	Washington West	1951	7.5	The alignment passes through residential and institutional neighborhoods. The western edge of the alignment follows the Baltimore and Ohio Railroad to the northwest.	Adjacent properties include residential neighborhoods, at least two school complexes, and an armory located approximately at the corner of Wayne Avenue and Fenton Street.
	Washington West	1956	7.5	The alignment passes through residential and institutional neighborhoods. The western edge of the alignment follows the Baltimore and Ohio Railroad to the northwest.	Adjacent properties include residential neighborhoods and at least three school complexes proximate to the alignment.
	Washington West	1965	7.5	The alignment passes through residential and institutional neighborhoods. The western edge of the alignment follows the Baltimore and Ohio Railroad to the northwest.	Adjacent properties include residential neighborhoods and at least three school complexes proximate to the alignment.
	Washington West	1971	7.5	The alignment passes through residential and institutional neighborhoods. The western edge of the alignment follows the Baltimore and Ohio Railroad to the northwest.	Adjacent properties include residential neighborhoods and at least three school complexes proximate to the alignment.
	Washington West	1980	7.5	The alignment passes through residential and institutional neighborhoods. The western edge of the alignment follows the Baltimore and Ohio Railroad to the northwest.	Adjacent properties include residential neighborhoods and at least three school complexes proximate to the alignment.
	Washington West	1983	7.5	The alignment passes through residential and institutional neighborhoods. The western edge of the alignment follows the Baltimore and Ohio Railroad to the northwest.	Adjacent properties include residential neighborhoods and at least three school complexes proximate to the alignment.

SEGMENT	MAP NAME	MAP YEAR	MAP SERIES	DESCRIPTION OF AREA WITHIN STUDY AREA	DESCRIPTION OF PROPERTIES ADJACENT TO STUDY AREA
	Washington and Vicinity (3 of 4)	1943	/ 5	The alignment continues along Campus Drive to University Lane and follows University Lane into Montgomery County. The road follows Bladensburg Road to Piney Branch Road and continues west along Piney Branch Road. The alignment crosses power lines east of the intersection of Riggs Road and University Lane.	Adjacent properties include campus and residential buildings.
	Washington East	1950	/ 5	The alignment continues along Campus Drive to University Lane and follows University Lane into Montgomery County. The road follows Bladensburg Road to Piney Branch Road and continues west along Piney Branch Road. The alignment crosses power lines east of the intersection of Riggs Road and University Lane.	Adjacent properties include campus and residential buildings.
	Washington East	1951	/ 5	The alignment continues along Campus Drive to University Lane and follows University Lane into Montgomery County. The road follows Bladensburg Road to Piney Branch Road and continues west along Piney Branch Road. The alignment crosses power lines east of the intersection of Riggs Road and University Lane.	Adjacent properties include campus and residential buildings.
University Boulevard	Washington East	1956	7.5	The alignment continues along Campus Drive to University Lane and follows University Lane across Northwest Branch Park into Montgomery County. The road follows Bladensburg Road to Piney Branch Road and continues west along Piney Branch Road. The alignment crosses power lines just west of 23rd Avenue.	Alignment properties include campus and residential buildings and some business facilities and schools.
	Washington East	1965	/ 5	The alignment continues along Campus Drive to University Lane and follows University Lane across Northwest Branch Park into Montgomery County. The alignment then heads west along Piney Branch Road. The alignment crosses power lines just west of 23rd Avenue.	Alignment properties include campus and residential buildings and some business facilities and schools.
	Washington East	1971	/.5	The alignment continues along Campus Drive to University Boulevard and follows University Boulevard across Northwest Branch Park into Montgomery County. The alignment then heads west along Piney Branch Road. The alignment crosses power lines just west of 23rd Avenue.	Alignment properties include campus and residential buildings and some business facilities and schools.
	Washington East	1979	7.5	Same as Washington East/1971/7.5	Same as Washington East/1971/7.5
	Washington and Vicinity (3 of 4)	1943	/ 5	The alignment heads northwest through Paint Branch Park, and across the Capital Transit Company rail line, then crosses Baltimore Boulevard cutting through the University of Maryland campus. The alignment then heads southwest to University Lane.	Adjacent properties include facilities associated with the College Park airport.
University of Maryland / College Park	Washington East	1950	7.5	No significant changes from the 1943, Washington and Vicinity, 3 of 4, Map.	No significant changes from the 1943, Washington and Vicinity, 3 of 4, Map.
	Washington East	1951	/ 5	The alignment heads northwest through Paint Branch Park, and across the Capital Transit Company rail line, then crosses Baltimore Boulevard cutting through the University of Maryland campus. The alignment then heads southwest to Campus Drive.	No significant changes from the 1950 map.

SEGMENT	MAP NAME	MAP YEAR	MAP SERIES	DESCRIPTION OF AREA WITHIN STUDY AREA	DESCRIPTION OF PROPERTIES ADJACENT TO STUDY AREA
	Washington East	1956	7.5	The alignment heads northwest through Paint Branch Park, and across the DC Transit rail line, then crosses Baltimore Avenue cutting through the University of Maryland campus. The alignment then heads southwest to Campus Drive.	Adjacent properties include facilities associated with the College Park airport, including fuel tanks.
University of Maryland / College Park	Washington East	1965	7.5	The alignment heads northwest through Paint Branch Park, and crosses Baltimore Avenue cutting through the University of Maryland campus. The alignment then heads southwest to Campus Drive.	Adjacent properties include facilities associated with the College Park airport, including fuel tanks.
	Washington East	1971	7.5	No significant changes from the 1965 map.	No significant changes from the 1965 map.
	Washington East	1979	7.5	No significant changes from the 1971 map.	No significant changes from the 1971 map.
	Washington and Vicinity (3 of 4)	1943	7.5	From the future location of Erco Field, the alignment heads northwest to the Baltimore and Ohio railroad and follows the railroad north to just west of the College Park airport.	Adjacent properties include mostly residential or university buildings and undeveloped land adjacent to Paint Branch Park.
Riverdale Park	Washington East	1950	7.5	The alignment follows Riverdale Road across Kenilworth Avenue, between two residential streets, to just west of Paint Branch, then cuts north to an area of wetlands and the location of the future Erco Field. From this location, the roadway cuts to the northwest. An alternative alignment follows Riverdale Road to Kenilworth Avenue, and then follows Kenilworth Avenue north to just north of Riverdale Heights, where it cuts west to the future site of Erco Field. West of Erco Field there were no significant changes from the 1943, Washington and Vicinity 3 of 4, Map.	The western alignment passes through residential neighborhoods until it heads north to the future site of Erco Field through an undeveloped track of land. West of Erco Field, there are no significant changes from the 1943, Washington and Vicinity 3 of 4, Map.
	Washington East	1951	7.5	The alignment follows Riverdale Road across Kenilworth Avenue, between two residential streets, to just west of Paint Branch, then cuts north to Erco Field. From Erco Field, the roadway cuts to the northwest. An alternative alignment follows Riverdale Road to Kenilworth Avenue and then follows Kenilworth Avenue north to just south of Sarvis Avenue, where it cuts west to Erco Field. From Erco Field, the alignment heads northwest to the Baltimore and Ohio Railroad and follows the railroad north to just west of the College Park airport.	The western alignment passes through residential neighborhoods until it heads north to Erco Field through an undeveloped track of land. West of Erco Field there are no significant changes from the 1950 map.

SEGMENT	MAP NAME	MAP YEAR	MAP SERIES	DESCRIPTION OF AREA WITHIN STUDY AREA	DESCRIPTION OF PROPERTIES ADJACENT TO STUDY AREA
	Washington East	1956	7.5	The alignment follows Riverdale Road across Kenilworth Avenue, between two residential streets, to just west of Paint Branch, then cuts north through the existing Riverdale Recreation Center to Erco Field. From Erco Field, the roadway cuts to the northwest. An alternative alignment follows Riverdale Road to Kenilworth Avenue north to just south of Sarvis Avenue, where it cuts west through an existing building to Erco Field. From Erco Field, the alignment heads northwest to the Baltimore and Ohio Railroad and follows the railroad north to just west of the College Park airport.	The western alignment passes through residential neighborhoods until it heads north to the Riverdale Recreation center and Erco Field through an undeveloped track of land. Adjacent properties include mostly residential or university buildings and Paint Branch Park. Other adjacent properties include facilities associated with the College Park airport, including fuel tanks.
Riverdale Park	Washington East	1965	7.5	The alignment follows Riverdale Road across Kenilworth Avenue, between two residential streets, to just west of Paint Branch, then cuts north through the existing Riverdale Recreation Center to Erco Field. From Erco Field, the roadway cuts to the northwest. An alternative alignment follows Riverdale Road to Kenilworth Avenue, then follows Kenilworth Avenue north to just south of Sarvis Avenue, where it cuts west through an existing building to Erco Field. From Erco Field, the alignment heads northwest to the Baltimore and Ohio railroad and follows the railroad north to just west of the College Park airport.	1
	Washington East	1971	7.5	The alignment follows Riverdale Road across Kenilworth Avenue to East West Highway. The alignment follows East West Highway to just west of Paint Branch, then cuts north through the existing Riverdale Recreation center to Erco Field. From Erco Field, the alignment cuts to the northwest. An alternative alignment follows Riverdale Road to the intersection of Kenilworth Avenue and East West Highway, then follows Kenilworth Avenue north to just south of Sarvis Avenue, where it cuts west through an existing building to Erco Field. West of Erco Field there were no significant changes from the 1965 map.	The alignment passes through residential neighborhoods until it heads north to the Riverdale Recreation Center and Erco Field through an undeveloped track of land. West of Erco Field there were no significant changes from the 1965 map.
	Washington East	1979	7.5	No significant changes from the 1971 map.	No significant changes from the 1971 map.
	Lanham	1950	7.5	The alignment does not cross through any existing buildings or roadways.	Several small buildings exist along Cross Street, which lies adjacent to the northern-most proposed route. A railroad line runs approximately 250 feet to the southwest of the alignment.
New Carrollton	Lanham	1957	7.5	The alignment does not cross through any existing buildings or roadways.	Several small buildings exist along Cross Street, which lies adjacent to the northern-most proposed route. A railroad line runs approximately 250 feet to the southwest of the alignment.
	Lanham	1965	7.5	The alignment does not cross through any existing buildings. The proposed alignment crosses Emerson Place at the southern-most point of alignment.	Several small buildings exist along Cross Street, which lies adjacent to the northern-most proposed route. A railroad line runs approximately 250 feet to the southwest of the alignment.
	Lanham	1971	7.5	The alignment does not cross through any existing buildings. The proposed alignment crosses Emerson Place at the southern-most point of alignment.	Several small buildings exist along Cross Street, which lies adjacent to the northern-most proposed route. A railroad line runs approximately 250 feet to the southwest of the alignment.

3	7272 Wisconsin Avenue	Embassy Plaza, Montgomery Apex Building	<ul> <li>Mar 14, 1990 - PSI informed MDE of arsenic content in soils up to 138 ppm observed in railroad ROW. MDE stated that the guidance for cleanup should be 80 ppm.</li> <li>Jul 5, 1990 - Eastern Chemical informed MDE of plan to remove contaminated soil.</li> <li>Jan 14, 1998 - MDE issued a registration for one 275-gallon diesel UST currently in use.</li> <li>Jul 11, 2001 - MDE OCP report stated that one 350-gallon diesel UST was removed on 11/28/01 after a failed tightness test on 7/16/01. Case was closed on 5/8/2002. (Case #02-0052MO)</li> <li>Nov 28, 2001 - MDE inspector reported that one 350-gallon diesel UST was removed. No odors or staining were observed and the soils were allowed to be backfilled.</li> <li>May 9, 2002 - MDE inspector reported that one 275-gallon diesel UST was removed.</li> </ul>
19	4400 Montgomery Avenue	Bethesda Chevy Chase Racquetball And Health Club	• Aug 11, 1981 - MDE issued a permit to operate one Peerless #211-13-WP gas-fired boiler.
81	7900 Connecticut Avenue	Columbia Country Club	• Nov 5, 1980 - MDE ARMA issued a permit to operate two Weil McLain #MGB15 gas-fired boilers.  • Dec 17, 1997 - MDE inspector reported that one 1,000-gallon gasoline UST was removed on 12/17/1997. No contaminated soils were observed and soils were allowed to be backfilled. Case was closed on 2/4/1999. (Case #98-1252MO)  • Feb 9, 1998 - MDE issued a memo stating that one 1,000-gallon gasoline UST, one 500-gallon gasoline UST, and one 500-gallon heating oil UST was currently in use.  • Mar 18, 1998 - MDE issued a memo stating that one 500-gallon gasoline UST requires spill, worefill, and tank/line corrosion protection.  • Jun 5, 1998 - MDE issued a memo stating that one 500-gallon gasoline UST requires spill, worefill, and tank/line corrosion protection.  • Mar 12, 1999 - MDE issued a memo stating that one 500-gallon gasoline UST and an passing CP anode test completes the requirements of the issued violation.  • Mar 12, 1999 - MDE issued a memo stating that one 500-gallon gasoline UST was removed.  • Dec 2, 2003 - MDE inspector reported that one 550-gallon gasoline UST was removed. Soils were contaminated but tank appeared in good condition. Contamination appeared to be surficial as a result of overfilling and dispenser spills. Soil samples were collected. Case was closed on 3/12/2004. (Case #04-1499MO)  • Apr 15, 2004 - MDE issued a memo stating that one 500-gallon heating oil UST was currently in use. One 1,000-gallon gasoline UST and one 500-gallon gasoline UST was removed.  • Oct 4, 2004 - MDE issued a tank closure report stating that one 550-gallon heating oil UST was removed. Soil was contaminated and removed from the site. Soil and groundwater samples were collected.  • Feb 4, 1999 - MDE issued a memo stating that one 1,000-gallon gasoline UST was removed. MDE does not require further action. (Case #98-1252 MO1)  • Dec 3, 2003 - MDE issued a memo stating that a 550-gallon UST containing gasoline was removed from property in December 2003. During the abandonment, the soils around the tank were discolored an

SITE ID	SITE ID ADDRESS FACILITY NAME		NOTES		
84	84 8505 Connecticut Avenue Exxon #26825, Chev CITGO		• Nov 18, 1994 - MDE inspector reported that one 10,000-gallon gasoline UST, one 8,000-gallon gasoline UST, one 6,000-gallon gasoline UST, two 2,000-gallon gasoline USTs, one 1,000-gallon heating oil UST and one 550-gallon waste oil UST were removed between 11/18/1994 and 12/2/1994. Eight soil samples were taken and contaminated soil was confirmed. Approximately 1.025 tons of contaminated soil were removed for disposal. One monitoring well was installed during the removal for groundwater sampling. Quarterly sampling was conducted at the facility until the case was closed on 10/16/1997. (Case #95-1251MO1)  • Dec 2, 1994 - MDE issued a facility summary stating that one 6,000-gallon gasoline UST, one 8,000-gallon gasoline UST, one 10,000-gallon gasoline UST, and one 550-gallon heating oil UST were removed in November 1994. The soils surrounding the tanks were contaminated and removed from the site. In December 1994, one 1,000-gallon waste oil UST and two 2,000-gallon gasoline USTs were removed. The soils around the waste oil tank were contaminated and removed from the site. One monitoring well was installed in the area below the waste oil tank. One soil sample was collected below each of the 7 tanks removed. During the construction of the gas station, two previously abandoned USTs were excavated and removed from site. Samples were analyzed for TPH-GRO, TPH-DRO, and BTEX. On 8/20/1998, four monitoring wells were installed to further evaluate soil and groundwater conditions. Soil samples were collected during the well installation. TPH-DRO was detected in 3 wells and MTBE was detected in two wells. BTEX was detected in one well, MTBE and TPH-DRO were detected during the well installation. TPH-DRO was detected in 3 wells and MTBE was detected in one well. (Case #95-1251 MO1)  • Jul 2, 1998 - MDE issued a memo stating that three 10,000-gallon gasoline USTs were currently in use. One 6,000-gallon gasoline UST, one 10,000-gallon gasoline UST, one 2,000-gallon gasoline UST, one 550-gallon heating oil UST were previously		
86	86 8513 & 8519 Connecticut Avenue Thomas W. Perry Inc.		<ul> <li>Sep 20, 1993 - MDE inspector reported that one 4,000-gallon gasoline UST was removed. Soil in the excavation was contaminated, but was not removed and allowed to be backfilled. No soil sampling was required by MDE. Case was closed on 7/17/1997. (Case #92-2639MO)</li> <li>Jul 16, 1997 - MDE inspector reported that one 550-gallon diesel UST, one 550-gallon heating oil UST, and one 300-gallon varsol UST was removed. Soil in the excavation variation and allowed to be backfilled.</li> </ul>		
89	3722 & 3728 Manor Road	Manor Apartments, Chevy Chase Land Company	<ul> <li>Oct 19, 2004 - MDE inspector reported that one 3,000-gallon heating oil UST was removed. No contamination was detected and a new UST will be installed in the same location. (Case #05-0803)</li> <li>Jul 27, 2010 - MDE inspector reported that one 3,000-gallon heating oil UST was currently in use. The tank failed the inspection due to documentation requirements.</li> </ul>		
153	8600 16th Street	Suburban Tower Apartments	<ul> <li>Nov 12, 1997 - MDE issued a memo stating that one 5,000-gallon heating oil UST was currently in use and one 20,000-gallon heating oil UST was abandoned in place. (Case #93-1353-MO)</li> <li>Aug 15, 2008 - MDE ARMA issued a permit to operate three HD Smith boilers. Two boilers were previously removed. Boilers were listed as using fuel oil and natural gas. (Case #031-0216)</li> </ul>		
160	8500 & 8555 16th Street	Summit Hills Apts.	Oct 26, 1998 - MDE issued a memo confirming the disposal of one 8,000-gallon UST.		

SITE ID	ADDRESS	FACILITY NAME	NOTES
162	8616 2nd Avenue	Silver Spring Main Post Office	• Sep 30, 1997 - MDE inspector reported that one 5,000-gallon gasoline UST was removed. Contamination was detected and soils were required to be removed. (Case #98-0716-MO)
180	1100 Bonifant Street	Silver Spring Transit Site	• Dec 23, 2009 - MDE issued a memo stating that one 1,000-gallon heating oil UST and one 550-gallon heating oil UST were removed on behalf of Mont. Co. DPW. On 11/9/2009, an MDE inspector arrived to field screen stockpiled petroleum-impacted soils. Due to the elevated levels of VOCs, 111.36 tons of petroleum-impacted soils were removed from site. TPH-DRO was detected at concentrations that exceeded MDE residential clean up standards, but below non-residential cleanup standards. Due to the unlikely occurrence of contamination migrating off-site, the case was closed. (Case #09-0634 MO)
280	25 Wayne Avenue	Wayne Manchester Apartments	<ul> <li>Nov 12, 1997 - MDE issued a memo stating that one 10,000-gallon heating oil UST was currently in use. (Case #90-2181-MO)</li> <li>Sep 22, 2004 - MDE inspector reported that one 10,000-gallon heating oil UST was removed. Soils were potentially contaminated with heating oil and removed from the site.</li> <li>MDE inspector claimed that a new UST will be installed in the same location. (Case #90-2181-MO)</li> <li>Feb 1, 2005 - MDE issued a memo stating that one 5,000-gallon heating oil UST was currently in use and one 10,000-gallon heating oil UST was removed. (Case #90-2181-MO)</li> </ul>
314	8750 Arliss Street	Giant Food Store No 366/66	• Mar 16, 2010 - MDE issued a memo stating that one 550-gallon diesel fuel tank was removed. Two soil samples were collected from 2 ft below the tank bottom and contamination was not detected. MDE did not require further corrective action and closed the case. (Case #10-0103 MO)
317	• May 26, 1993 - The owner submitted a letter to MDE stating that there were three 10,000-gallon gasoline USTs and two contaminants were discovered in groundwater samples and permanent monitoring wells were installed. (Case #93-2695-MO)  • May 12, 1995 - The owner submitted a letter to MDE stating that groundwater samples collected from monitoring wells of gasoline. (Case #93-2695-MO)  • May 18, 1998 - MDE inspector reported that free product was observed in the on-site monitoring wells. (Case #93-2695-MO)  • Dec 3, 1999 - MDE inspector reported that free product, MTBE, and BTEX were detected in samples collected from the monitoring wells. (Case #93-2695-MO)  • Oct 6, 2003 - Two 10,000-gallon gasoline USTs, one 10,000-gallon diesel UST, one 1,000-gallon waste oil UST, and one 1,000-gallon waste oil UST, and one 10,000-gallon gasohol UST, one 10,000-gallon gasohol UST, and one USTs were previously removed.  • Aug 18, 2004 - MDE issued a memo stating that one 12,000-gallon gasohol UST, one 10,000-gallon gasohol UST, and one USTs were previously removed.  • Apr 18, 2006 - MDE issued a memo acknowledging that contamination was detected in monitoring wells on-site and the Ust the residual contamination is stable and no further action is required. (Case #93-2695-MO)  • Jun 13, 2006 - The owner submitted a report acknowledging the completion of required remedial activities. (Case #93-2695-MO)		<ul> <li>May 26, 1993 - The owner submitted a letter to MDE stating that there were three 10,000-gallon gasoline USTs and two 1,000-gallon waste oil USTs on site. #### **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

#### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified.

The Map ID column refers to the Map ID-Focus Map(s) of the listed site.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### **FEDERAL RECORDS**

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/25/2011 has revealed that there are 2 CERCLIS sites within the searched area.

Site	Address	Мар ІО
WALTER REED ARMY MEDICAL CENTE	2461 LINDEN LANE	3-3
NATIONAL NAVAL MEDICAL CENTER	9801 WISCONSIN AVE	35-7,8

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/25/2011 has revealed that there is 1 CERC-NFRAP site within the searched area.

SILVER SPRINGS CUSTOM FURNITUR	8943 BROOKVILLE ROAD	27-3,9

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 05/25/2010 has revealed that there are 2 CORRACTS sites within the searched area.

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/11/2011 has revealed that there are 2 RCRA-TSDF sites within the searched area.

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/11/2011 has revealed that there are 5

RCRA-LQG sites within the searched area.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2011 has revealed that there are 89 RCRA-SQG sites within the searched area.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/11/2011 has revealed that there are 64 RCRA-CESQG sites within the searched area.

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 03/11/2011 has revealed that there are 33 RCRA-NonGen sites within the searched area.

UNIVERSITY CHURCH NURSERY SCHO	3621 CAMPUS DR.	288-13,22
UNIVERSITY CHURCH NURSERY SCH	3621 CAMPUS DR	288-13,22

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 2 HIST FTTS sites within the searched area.

#### STATE AND LOCAL RECORDS

MD SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of the Environment's Notice of Potential Hazardous Waste Sites list.

A review of the MD SHWS list, as provided by EDR, and dated 10/01/2009 has revealed that there are 4 MD SHWS sites within the searched area.

Site	Address	Map ID
WALTER REED AMC FOREST GLEN AN Facility Status: Unidentified	2961 LINDEN LN	1-3

RE: Request for Information concerning the Purple Line Hazardous Waste Investigations, Montgomery and Prince George's Counties, MD [CEM Project No.: 10-037.001]

Dear Mrs. Mueller:

We are currently contracted by the Maryland Transit Administration (MTA) to review any available data regarding pollution/contamination incidents that may have occurred in the vicinity of the study area located in Montgomery and Price George's Counties in Maryland.

Under the Public Information Act, I would like to request any regulatory records published for this location or the surrounding area in order to search for any information you may have regarding air, land, or water pollution incidents, including:

- · Chemical or Petroleum releases
- Underground Storage Tanks (USTs)
- RCRA Generators
- Asbestos or lead paint information

- CERCLA or Superfund haz-waste sites
- Hazardous or Toxic materials/waste spills
- Clean Air Act, RCRA, TSCA, or SARA violations

The properties in question are summarized in the attached table [Attachment 1].

Thank you very much for your time and consideration. I would appreciate your permission to review this information as soon as possible. If the cost associated with this file search would exceed \$25, please contact me. If you have any additional questions, please do not hesitate to contact me at our offices at (410)-893-9016 at any time, or you can email me at kdimartino@cemscience.com.

Best Regards,

Kevin DiMartino

Dear Mr. DiMartino:

The Maryland Department of the Environment (MDE) received your recent request for information under the Public Information Act (PIA).

Your request has been assigned the tracking number listed above. Please use this number in all communications referring to this request. Your request has been reviewed and distributed to all appropriate MDE programs. After all programs have completed the search, you will be notified by mail as to whether or not pertinent records exist. If files exist, the notification letter will contain instructions for reviewing the records. Only after you schedule an appointment to review files will the requested files be gathered in preparation for your review.

There may be fees associated with the search whether or not files are located. The PIA fees are limited to standard charges for direct document search, review, duplication, and postage. The first two hours of search are free of charge. If your request did not indicate a willingness to pay fees, you will be notified only if the fees are likely to exceed \$25.

When requesting information regarding this request, please cite the tracking number referenced above. If you have any questions, please call me at (410) 537-4120.

Sincerely,

Joane Mueller PIA Coordinator

RE: Request for Information concerning the Purple Line Hazardous Waste Investigations, Montgomery and Prince George's Counties, MD [CEM Project No.: 10-037.001]

Dear Mrs. Mueller:

We are currently contracted by the Maryland Transit Administration (MTA) to review any available data regarding pollution/contamination incidents that may have occurred in the vicinity of the study area located in Montgomery and Price George's Counties in Maryland.

Under the Public Information Act, I would like to request any regulatory records published for this location or the surrounding area in order to search for any information you may have regarding air, land, or water pollution incidents, including:

- Chemical or Petroleum releases
- Underground Storage Tanks (USTs)
- RCRA Generators
- Asbestos or lead paint information

- CERCLA or Superfund haz-waste sites
- Hazardous or Toxic materials/waste spills
- Clean Air Act, RCRA, TSCA, or SARA violations

The properties in question are summarized in the attached table [Attachment 1].

Thank you very much for your time and consideration. I would appreciate your permission to review this information as soon as possible. If the cost associated with this file search would exceed \$25, please contact me. If you have any additional questions, please do not hesitate to contact me at our offices at (410)-893-9016 at any time, or you can email me at kdimartino@cemscience.com.

Dear Mr. DiMartino:

The Maryland Department of the Environment (MDE) received your recent request for information under the Public Information Act (PIA).

Your request has been assigned the tracking number listed above. Please use this number in all communications referring to this request. Your request has been reviewed and distributed to all appropriate MDE programs. After all programs have completed the search, you will be notified by mail as to whether or not pertinent records exist. If files exist, the notification letter will contain instructions for reviewing the records. Only after you schedule an appointment to review files will the requested files be gathered in preparation for your review.

There may be fees associated with the search whether or not files are located. The PIA fees are limited to standard charges for direct document search, review, duplication, and postage. The first two hours of search are free of charge. If your request did not indicate a willingness to pay fees, you will be notified only if the fees are likely to exceed \$25.

When requesting information regarding this request, please cite the tracking number referenced above. If you have any questions, please call me at (410) 537-4120.

Sincerely,

Joane Mueller PIA Coordinator

> Re: Purple Line Hazardous Waste Investigation Freedom of Information Act Request: 03-FOI-01148-11

Dear Mr. DiMartino:

In response to the above-referenced Freedom of Information Act request dated August 25, 2011 and received on September 7, 2011, as further limited by your phone conversation with Shanna Halpern of my staff wherein you agreed that a Compliance Monitoring and Enforcement Data Summary Report (CME Report) would be sufficient for any sites that had large response the Land and Chemicals Division searched its records and made the following determinations:

The Resource Conservation and Recovery Act Program only found responsive information for the Walter Reed, Forest Glen site. That information, a CME Report, is enclosed.

The Pesticides/Asbestos and the Toxics Programs found no responsive information.

You may appeal this response to the National Freedom of Information Officer, U.S. EPA, Records, FOIA and Privacy Branch, 1200 Pennsylvania Avenue, NW (2822T), Washington, DC 20460, Fax: (202) 566-2147, E-mail: <a href="https://hq.foia@epa.gov">hq.foia@epa.gov</a>. Only items mailed through the United States Postal Service may be delivered to 1200 Pennsylvania Avenue, NW. If you are submitting your appeal via hand delivery, courier service or overnight delivery, you must address your correspondence to 1301 Constitution Avenue, N.W., Room 6416J, Washington, DC 20004. Your appeal must be made in writing, and it must be submitted no later than 30 calendar days from the date of this letter. The Agency will not consider appeals received after the 30 calendar day limit. The appeal letter should include the FOI listed above. For quickest possible handling, the appeal letter and its envelope should be marked "Freedom of Information Act Appeal."

If you have any questions, please contact Ms. Halpern of my staff at (215) 814-3396.

Sincerely,

Evelyn Velazquez

Applying Practical Science to Improve Communities September 19, 2011

Mr. Richard Van Holt Freedom of Information Officer U.S. EPA Region 3 1650 Arch Street (3CG10) Philadelphia, PA 19103-2029

RE: Request for Information concerning the Purple Line Hazardous Waste Investigations, Montgomery and Prince George's Counties, MD [CEM Project No.: 10-037.001]

Dear Mr. Van Holt:

We are currently contracted by the Maryland Transit Administration (MTA) to review any available data regarding pollution/contamination incidents that may have occurred in the vicinity of the study area located in Montgomery and Price George's Counties in Maryland

Under the Freedom of Information Act, I would like to request any regulatory records published for this location or the surrounding area in order to search for any information you may have regarding air, land, or water pollution incidents, including:

- Chemical or Petroleum releases
- Underground Storage Tanks (USTs)
- RCRA Generators
- Asbestos or lead paint information

- CERCLA or Superfund haz-waste sites
- Hazardous or Toxic materials/waste spills
- Clean Air Act, RCRA, TSCA, or SARA violations

The properties in question are summarized in the attached table [Attachment 1].

Thank you very much for your time and consideration. I would appreciate your permission to review this information as soon as possible. If the cost associated with this file search would exceed \$25, please contact me. If you have any additional questions, please do not hesitate to contact me at our offices at (410)-893-9016 at any time, or you can email me at kdimartino@cemscience.com.

Best Regards,

Kevin DiMartino

RE:

Purple Line Hazardous Waste Investigations in Montgomery

And Prince George's Counties

Freedom of Information Act Request: #03-FOI-01224-11

Dear Mr. DiMartino:

In response to the above-referenced Freedom of Information Act (FOIA) request, dated September 19, 2011 and received September 28, 2011, please be advised that the Resource Conservation and Recovery Act (RCRA) Program, the Toxics Programs Branch, and the Pesticides/Asbestos Programs Branch, Land and Chemicals Division processed your request and found no information responsive. However, the RCRA Program is enclosing a Compliance Monitoring & Enforcement (CM&E) Report which may be helpful to you. The CM&E Report shows any violations or enforcement actions concerning facilities within the zip code of interest.

Our search for records is based primarily on the information you provide. In order to complete searches for locations in another zip code that are either adjacent to, or within one mile of the above-mentioned property, we will need additional zip codes or property addresses. Kindly submit the additional information in a FOIA request format, to Richard Van Holt, Freedom of Information Act Officer, at the above address.

The information requested on storage tanks, above ground or below ground, is not in the possession of the Land and Chemicals Division, but may be available from the State at the following address:

Maryland Dept. of the Environment 1800 Washington Blvd. Underground Storage Tank Management Baltimore, MD 21230-1719 Phone: (410) 537-3000

You may appeal this response to the National Freedom of Information Officer, U.S. EPA, Records, FOIA and Privacy Branch, 1200 Pennsylvania Avenue, NW (2822T), Washington, DC 20460, Fax: (202) 566-2147, E-mail: hq.foia@epa.gov. Only items mailed through the United States Postal Service may be delivered to 1200 Pennsylvania Avenue, NW. If you are submitting your appeal via hand delivery, courier service or overnight delivery, you must address your correspondence to 1301 Constitution Avenue, NW, Room 6416J, Washington, DC 20004. Your appeal must be made in writing, and it must be submitted no later than 30 calendar days from the date of this letter. The Agency will not consider appeals received after the 30 day calendar day limit. The appeal letter should include the FOI listed above. For quickest possible handling, the appeal letter and its envelope should be marked "Freedom of Information Act Appeal."

If you have any questions, feel free to contact Shanna Halpern, a member of my staff, at (215) 814-3396.

Sincerely,

Environmental Protection Specialist

Land and Chemicals Division

Freedom of Information Act Request: # 03-FOI-00164-12

Dear Mr. DiMartino:

In response to the above-referenced Freedom of Information Act (FOIA) request, dated November 14, 2011 and received November 28, 2011, please be advised that the Resource Conservation and Recovery Act (RCRA) Program, the Toxics Programs Branch, and the Pesticides/Asbestos Programs Branch, Land and Chemicals Division processed your request and found no information responsive. However, the RCRA Program is enclosing three Compliance Monitoring & Enforcement (CM&E) Reports which may be helpful to you. The CM&E Reports show any violations or enforcement actions concerning facilities within the zip codes of interest.

Our search for records is based primarily on the information you provide. In order to complete searches for locations in another zip code that are either adjacent to, or within one mile of the above-mentioned property, we will need additional zip codes or property addresses. Kindly submit the additional information in a FOIA request format, to Richard Van Holt, Freedom of Information Act Officer, at the above address.

The information requested on storage tanks, above ground or below ground, is not in the possession of the Land and Chemicals Division, but may be available from the State at the following address:

Maryland Dept. of the Environment 1800 Washington Blvd. Underground Storage Tank Management Baltimore, MD 21230-1719 Phone: (410) 537-3000

You may appeal this response to the National Freedom of Information Officer, U.S. EPA, Records, FOIA and Privacy Branch, 1200 Pennsylvania Avenue, NW (2822T), Washington, DC 20460, Fax: (202) 566-2147, E-mail: hq.foia@epa.gov. Only items mailed through the United States Postal Service may be delivered to 1200 Pennsylvania Avenue, NW. If you are submitting your appeal via hand delivery, courier service or overnight delivery, you must address your correspondence to 1301 Constitution Avenue, NW, Room 6416J, Washington, DC 20004. Your appeal must be made in writing, and it must be submitted no later than 30 calendar days from the date of this letter. The Agency will not consider appeals received after the 30 day calendar day limit. The appeal letter should include the FOI listed above. For quickest possible handling, the appeal letter and its envelope should be marked "Freedom of Information Act Appeal."

Freedom of Information Act Request: # 03-FOI-00251-12

Dear Mr. DiMartino:

In response to the above-referenced Freedom of Information Act (FOIA) request, dated December 19, 2011 and received December 29, 2011, please be advised that the Resource Conservation and Recovery Act (RCRA) Program, the Toxics Programs Branch, and the Pesticides/Asbestos Programs Branch, Land and Chemicals Division processed your request and found no information responsive. However, the RCRA Program is enclosing eight Compliance Monitoring & Enforcement (CM&E) Reports which may be helpful to you. The CM&E Reports show any violations or enforcement actions concerning facilities within the zip codes of interest.

Our search for records is based primarily on the information you provide. In order to complete searches for locations in another zip code that are either adjacent to, or within one mile of the above-mentioned property, we will need additional zip codes or property addresses. Kindly submit the additional information in a FOIA request format, to Richard Van Holt, Freedom of Information Act Officer, at the above address.

The information requested on storage tanks, above ground or below ground, is not in the possession of the Land and Chemicals Division, but may be available from the State at the following address:

Maryland Dept. of the Environment 1800 Washington Blvd. Underground Storage Tank Management Baltimore, MD 21230-1719 Phone: (410) 537-3000

You may appeal this response to the National Freedom of Information Officer, U.S. EPA. Records, FOIA and Privacy Branch, 1200 Pennsylvania Avenue, NW (2822T), Washington, DC 20460, Fax: (202) 566-2147, E-mail: hq.foia@epa.gov. Only items mailed through the United States Postal Service may be delivered to 1200 Pennsylvania Avenue, NW. If you are submitting your appeal via hand delivery, courier service or overnight delivery, you must address your correspondence to 1301 Constitution Avenue, NW, Room 6416J, Washington, DC 20004. Your appeal must be made in writing, and it must be submitted no later than 30 calendar days from the date of this letter. The Agency will not consider appeals received after the 30 day calendar day limit. The appeal letter should include the FOI listed above. For quickest possible handling, the appeal letter and its envelope should be marked "Freedom of Information Act Appeal."

If you have any questions, feel free to contact Shanna Halpern, a member of my staff, at (215) 814-3396.

Sincerely,

Environmental Protection Specialist

Land and Chemicals Division

RE: Request for Information concerning the Purple Line Hazardous Waste Investigations, Montgomery and Prince George's Counties, MD [CEM Project No.: 10-037.001]

Dear Mr. Van Holt:

We are currently contracted by the Maryland Transit Administration (MTA) to review any available data regarding pollution/contamination incidents that may have occurred in the vicinity of the study area located in Montgomery and Price George's Counties in Maryland

Under the Freedom of Information Act, I would like to request any regulatory records published for this location or the surrounding area in order to search for any information you may have regarding air, land, or water pollution incidents, including:

- Chemical or Petroleum releases
- Underground Storage Tanks (USTs)
- RCRA Generators
- Asbestos or lead paint information

- CERCLA or Superfund haz-waste sites
- Hazardous or Toxic materials/waste spills
- Clean Air Act, RCRA, TSCA, or SARA violations

The properties in question are summarized in the attached table [Attachment 1].

Thank you very much for your time and consideration. I would appreciate your permission to review this information as soon as possible. If the cost associated with this file search would exceed \$25, please contact me. If you have any additional questions, please do not hesitate to contact me at our offices at (410)-893-9016 at any time, or you can email me at <a href="mailto:kdimartino@cemscience.com">kdimartino@cemscience.com</a>.
